CHOHO HIGH-END INDUSTRIAL CHAIN— **PALM OIL CHAIN**

征和高端工业链条 **棕榈油链**

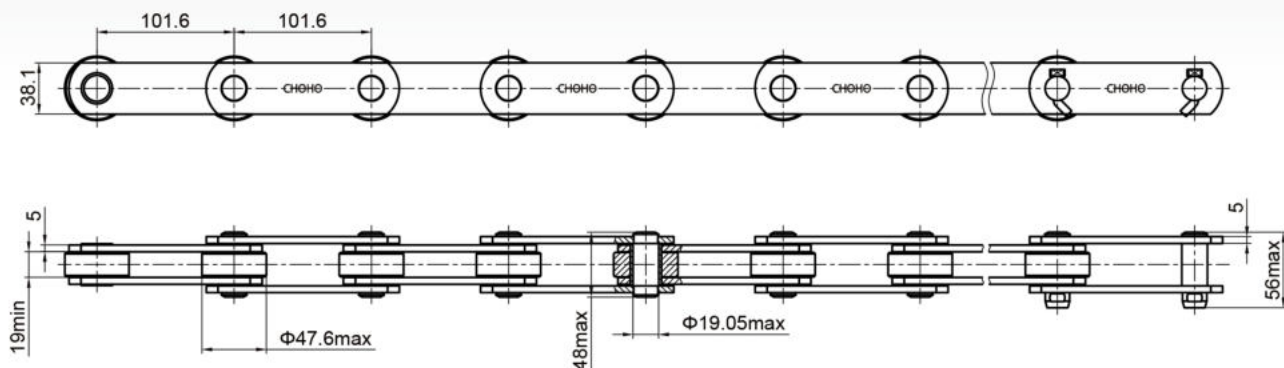

食品行业链条主要是指用于食品加工机械、肉联加工屠宰生产线、水果挑选生产线、粮油机械、制糖设备等链条。棕榈油链条是输送链条的一种，利用棕榈油链条可以把油棕榈树上的棕果输送到压榨机器上进行压榨，产品覆盖了棕榈油生产的每一个环节，是从棕榈果到成品棕榈油生产装备所使用的链条。

The food industry chain mainly refers to chains used for food processing machinery, meat processing and slaughtering production lines, fruit selection production lines, grain and oil machinery, sugar processing equipment, etc. The palm oil chain is a kind of conveying chain. The palm oil chain can be used to transport the palm fruit on the oil palm tree to the pressing machine for pressing. The product covers every link of palm oil production, from palm fruit to finished palm oil Chains used in production equipment.

棕榈油链条具有较高的强度，输送平稳，良好的防腐蚀、耐磨损等性能。棕榈油链条需要链板材料密度高，且热处理要做到保温时间长，所以我们采用加强型链板优化设计，其他零件表面硬化处理，并上特殊润滑脂，使得链条强度高、耐磨性能好。

Palm oil chain has high strength, stable conveying, good anti-corrosion, wear-resistant and other properties. Palm oil chains require a high density chain plate material, and the heat treatment should be kept for a long time, so we adopt the optimized design of the reinforced chain plate, the surface of other parts is hardened, and special grease is applied to make the chain high in strength and good in wear resistance.

优质的原材料

High Quality Raw Materials

根据工况选择最为适当的组成材料及其硬度，满足机械设备复杂的工作环境。

According to the conditions to choose the most appropriate constituent materials and their hardness, meet the mechanical equipment complex working environment.

优化结构设计

Optimal Structure Design

设计结构优化，提高了链条抗磨损、抗疲劳、抗腐蚀、抗氧化等性能，满足各类设备使用的要求。

Design structure optimization, improve the chain wear resistance, fatigue resistance, corrosion resistance, oxidation resistance and other properties.

特殊铆接技术

Special Riveting Technique

特殊的铆接技术，最大程度的减小铆销轴外壁造成的内径挤压变小，不影响使用且铆接质量高。

Special riveting technology can minimize the inner diameter extrusion caused by the outer wall of the riveting pin shaft, which does not affect the use and high riveting quality.

征和是链传动行业首家A股上市公司，是国家认定的企业技术中心，拥有强大的链系统产品生产制造能力和研发能力，征和棕榈油链条以性能稳定，平稳可靠著称。

As the first A-share listed company in the chain drive industry, CHOHO is the enterprise technology center recognized by the state. It has A strong manufacturing capacity and research and development capacity of chain system products. CHOHO palm oli machine chain is famous for its stable performance, stable and reliable.
